

ATKINS Case Study

Last Modified on 11/28/2017 9:01 am EST

ATKINS's i-gate project automated the mission-critical and ultra-complex commercial service delivery process with Sequence BPM platform from PNMsoft. The company behind the London Olympics 2012, Dubai Metro, and other huge projects orchestrates information from various line-of-business applications such as Microsoft Dynamics CRM, JD Edwards, SharePoint & Oracle e-Business Suite, to standardize and optimize its core business processes on delivering large-scale complex engineering projects.
