

Manage Global Settings

Last Modified on 01/31/2018 2:05 am EST

In the Global Settings section, you can manage settings for the entire Cora SeSequence environment, such as connections between Cora SeSequence and external systems, global stages, global variables, and more.

The screenshot displays the Cora SeSequence administration interface. At the top, the Cora SeSequence logo is on the left, and the user 'Welcome Alex Fiedler' with a 'Logout' button is on the right. A left-hand navigation menu is visible, with 'Global Settings' highlighted by a red box. The main content area features six dashboard tiles:

- Manage Applications** (Blue tile): Includes 'Create a New Workflow' and 'Import Workflow'.
- Getting Started** (Light Blue tile): Includes 'Getting Started Tutorial', 'Building a Workflow', 'Human Activities', and 'Defining Form Controls'.
- Control and Monitor** (Green tile): Includes 'Handle Running Processes' and 'Open Process Lab'.
- Manage Organization** (Purple tile): Includes 'Active Directory Settings', 'Edit Organization', and 'Manage Calendars'. It also shows 'Last ADSS Sync: Dec 27, 2017, 12:46 PM' and 'Status: Failed'.
- Watch Videos** (Light Green tile): Includes 'Creating Basic Applications', 'Advanced Applications', 'Creating Dashboards', and 'Administration Intro'.
- Installation Details** (Dark Grey tile): Displays system information: 'Server Name: admindev.pnmssoftlabs.c...', 'Assembly Version: 8.5.0.305', 'Database Name: Sequence', 'Database Version: 8.5.0.0', 'License Expiration Date: NA', and 'Number of Active Users: 186'.

The navigation menu on the left includes the following items:

- Administration
 - Analytics
 - Global Settings** (highlighted)
 - Application Variables
 - Connection Strings
 - Credentials
 - CRM Connections
 - Custom Message Types
 - Email Templates
 - External Service Consumers
