

Create an Employee Record

Last Modified on 11/28/2017 5:51 am EST

You can add an employee to the system and define their profile configuration, including:

- Domain
- E-mail
- Interface Language
- User Name
- Password

Procedure

1. In the Administrator console, navigate to **Administration > Organization Settings > Employees**.
2. Click the **Add New Record Button**.
3. Complete the employee form, and click **Add**.
