Add a Combo Box to a Form

Last Modified on 02/16/2021 11:17 am EST

> Note that the user interface has changed in later versions of Cora SeQuence, but the procedure demonstrated in this article and video remains the same.

1. Access a form in App Studio.
2. In the Toolbox panel, click **Combo Box**.
3. Configure the combo box parameters.

   Combo Box Parameters

Parameter	Description
Choose Data Source	Populate the combo box choices from a data source list.
Edit Choices	Manually enter the combo box choices.
Add Required Field Validator	Define the message that appears to users when they provide an invalid value for the combo box.
Edit Template	Select a style template for the combo box.

4. (Optional) In the Properties panel, configure advanced combo box parameters.
