

And Activity Overview

Last Modified on 12/03/2017 8:33 am EST

Context

The And Activity requires that all source activities are complete before the workflow can continue. In the example diagram below, the workflow can continue only when all three source activities are complete.

Use Cases

Wizard Tips

- Right-click the And Activity, select **Edit**, and complete the wizard.
- Connect the And Activity to at least one source activity.
