

Active Processes Page

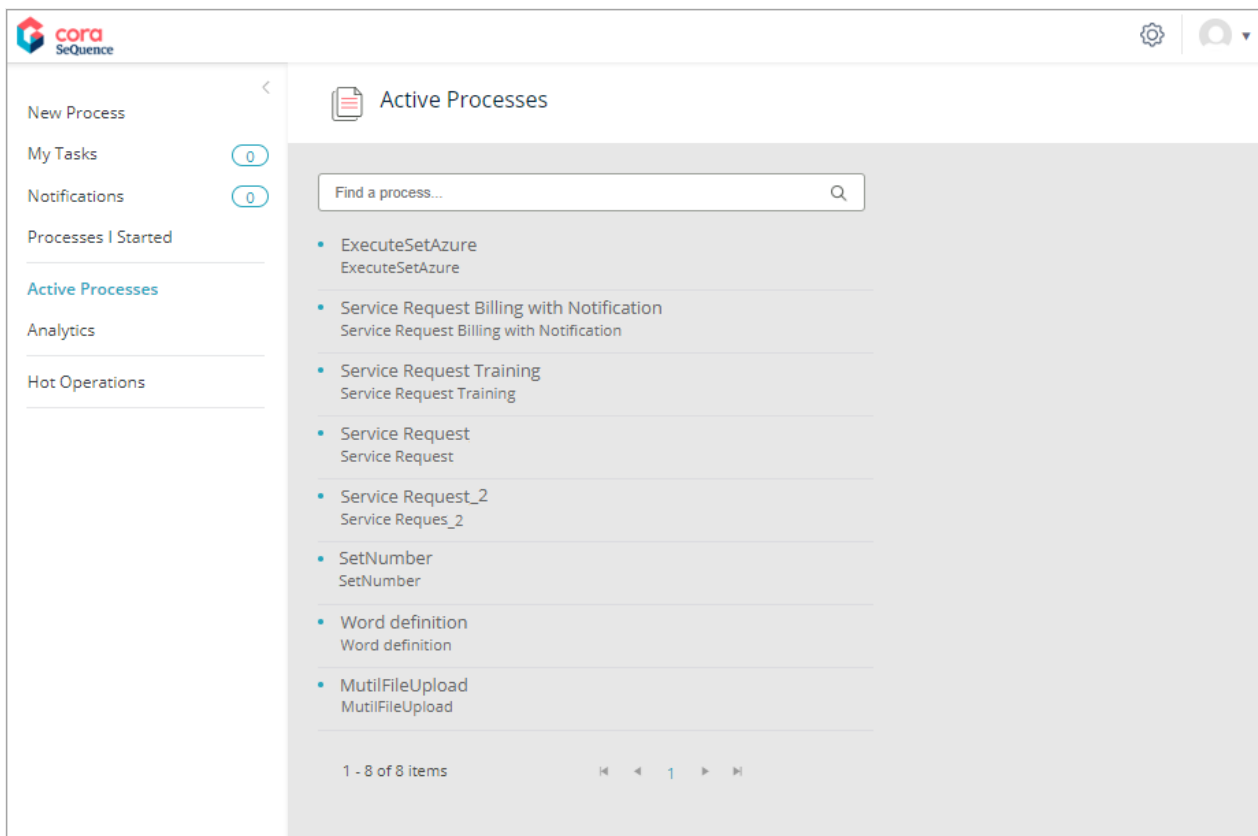

Last Modified on 04/30/2019 10:08 am EDT

v8.3.4 and later

The Flowtime Active Processes page displays the processes you have permissions to view in your environment.

On the Active Processes page, you can:

- Search for a specific process.
- Select a process to view details of all its open and completed instances, start a new process instance, or export process instances.

The screenshot shows the 'Active Processes' page in the Cora SeSequence application. The page has a left-hand navigation menu with the following items: 'New Process', 'My Tasks' (with a '0' badge), 'Notifications' (with a '0' badge), 'Processes I Started', 'Active Processes' (highlighted in blue), 'Analytics', and 'Hot Operations'. The main content area is titled 'Active Processes' and features a search bar with the placeholder text 'Find a process...'. Below the search bar is a list of processes, each with a blue dot icon and a title: 'ExecuteSetAzure', 'Service Request Billing with Notification', 'Service Request Training', 'Service Request', 'Service Request_2', 'SetNumber', 'Word definition', and 'MutilFileUpload'. At the bottom of the list, it shows '1 - 8 of 8 items' and a pagination control with the number '1' in the center.

v8.3 and earlier

The Flowtime Processes List page displays the processes the end user has permissions for.

To perform available actions on a process, click the three button dot next to the process name.

- Open the process's Process Page, which includes the process instances.
- Start a new process instance.
