

Generate Workflow Documentation

Last Modified on 11/30/2017 7:21 am EST

You can generate a single document as a web page that contains all of the workflow's important details. The documentation is useful for collaborating with stakeholders and managers, and it provides a summary of the workflow's major elements.

- Activities
- Data Fields
- Views
- Permissions
- More...

Procedure

1. In App Studio, click the **Collaboration** tab.
2. Click **Generate Documentation**.

Example

Human Activities

Application Request

Type: Form

Activity Id: 9edee48b-f465-472e-abf5-b644be5d85b7

Alias: Application Request

Description:

Blocking: True

Views List:

1. DefaultView
2. GridView

Data Model:

ApplicationRequest - Table

Field Name	Filed Type	Default Value	Is Primary
fidId	Int32		True
fidIWfid	Int32		False
fidIActId	Int32		False
fidAllId	Int32		False
fidMasterIWfid	Int32		False

Permissions:

What's Next

To share the documentation, you can copy and paste the information into a Word file. Alternatively, if other users have permission to access this workflow, you can send the documentation page URL.
