

Assign Activity Overview

Last Modified on 01/31/2018 2:06 am EST

Context

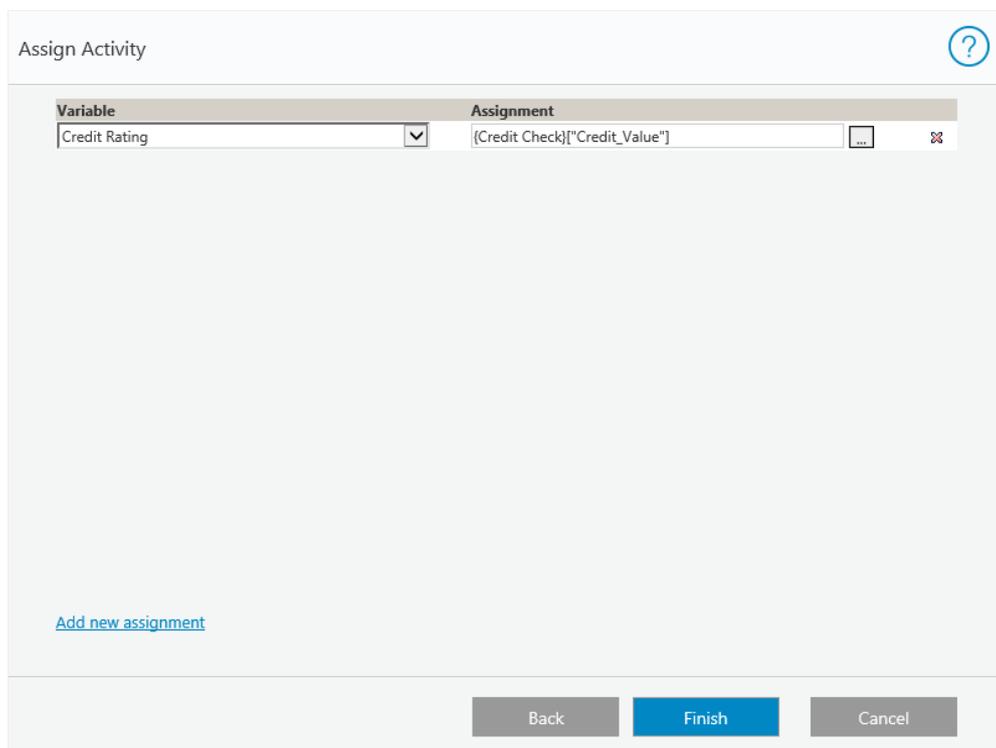

Use the Assign Activity to set workflow variables to specific values during workflow execution.

Use Cases

- Control the number of iterations. (Scan an app a certain number of times).

Wizard Tips

- You can edit the Assignment using the expression wizard (ellipsis button) or by entering a value directly in the Assignment text box.

The screenshot shows the 'Assign Activity' wizard interface. At the top, the title 'Assign Activity' is displayed on the left, and a help icon (a question mark in a circle) is on the right. Below the title bar is a table with two columns: 'Variable' and 'Assignment'. The 'Variable' column contains a dropdown menu with 'Credit Rating' selected. The 'Assignment' column contains a text box with the expression '[Credit Check] ["Credit_Value"]'. To the right of the text box is an ellipsis button (...) and a delete icon (an 'X' in a square). Below the table, there is a link that says 'Add new assignment'. At the bottom of the wizard, there are three buttons: 'Back', 'Finish', and 'Cancel'.

Variable	Assignment
Credit Rating	[Credit Check] ["Credit_Value"]

[Add new assignment](#)

Back Finish Cancel
