

## Submit a Form

Last Modified on 04/24/2017 7:56 am EDT

Use the API to submit a form.

```
using PNMsoft.Sequence.Data;
using PNMsoft.Sequence.Forms.Activities;
using PNMsoft.Sequence.Linq;

namespace SequenceEx.Form.Samples
{
    public class SubmitFormExample    {
        void SubmitData(int activityInstanceId, string queryName)
        {
            FormActivityExecutor executor = FormActivityExecutor.GetExecutor(activityInstanceId);

            using (DataContext ctx = executor.CreateDataContext())
            {
                IDataTable tbl = ctx.GetDataTable(queryName);

                IDataRow row = tbl.CreateRow();
                row.SetField("Field1", "Field1 Value");
                row.SetField("NumericField", 35);
                tbl.InsertOnSubmit(row);

                ctx.SubmitChanges();
            }
        }
    }
}
```
