Access a Sequence Service Instance

Use the API to access a service instance.

This example shows how to access an OBS (organizational base structure) service.

```
// Returns null if the service is not defined in the configuration file.
IObsService obsService = engine.GetService();

// Throws an exception if the service is not defined in the configuration file.
IObsService obsService = engine.GetServiceWithCheck();
```

Add the following section in the section of the configuration file.

```
#.#.#.#, Culture=neutral, PublicKeyToken=YourPublicKeyToken">
```
