

## Create a New Workflow Instance

Last Modified on 04/25/2017 3:00 am EDT

Use the API to create a workflow instance based on the template GUID.

```
public static int CreateWorkflowInstance(Guid workflowId)
{
    IWorkflowExecutionService exe =
        engine.GetService();
    WorkflowInstance workflowInstance = exe.StartWorkflow(workflowId);

    return workflowInstance.Id;
}
```

Add the following section to the configuration file.
