

## Get a Workflow Instance

Last Modified on 01/18/2018 5:14 am EST

Use the API to get a workflow instance.

```
using PNMsoft.Sequence;
using PNMsoft.Sequence.Runtime;

namespace SequenceEx.Samples
{
    public class GetWorkflowInstanceSample
    {
        public WorkflowInstance GetWorkflowInstance(int workflowInstanceId)
        {
            IWorkflowExecutionService svc = WorkflowRuntime.Engine.GetServiceWithCheck();
            return svc.GetWorkflowInstance(workflowInstanceId);
        }
    }
}
```
