# Analytics Overview

> Starting with V10.0, Cora SeQuence has been renamed to Cora Orchestration.

## V10.0

### Overview

The analytics feature provides developers and administrators visual insight into the solutions they build.

- How the solution optimizes business processes
- The solution's ROI
- Easy to identify areas for improvement
- Visual KPI

### Managing Analytics

You manage analytics from several places.

#### Administrator Console

- To access the analytics feature, navigate to **Administration** > **Analytics** > **Dashboard Suites**.
- View available dashboard suites in the Dashboard Suites grid.
- To create a new dashboard suite, click the **Add Dashboard Suite**.
- To import a dashboard suite, click the **Import Dashboard Suite**.

#### Dashboard Suite Canvas

- To access the dashboard suite canvas, from the Administrator console, create a new dashboard suite, or edit an existing dashboard suite.
- Define the data model.
- Create and customize dashboards.
- Define and create KPIs.
- Set dashboard suite permissions.
- Preview the dashboard suite.

## Orchestration Portal

View the dashboard suite in the runtime environment.

## v8.3 and later

## Overview

The analytics feature provides developers and administrators visual insight into the solutions they build.
