

HTTP Status 401 When Trying to View a Dashboard in Flowtime

Last Modified on 11/28/2017 8:05 am EST

Description

After you successfully publish a dashboard, you receive an HTTP status 401 when you try to view the dashboard in Flowtime.

Cause

Identity impersonation does not work with SSRS.

Affected Versions

7.7-7.10

Solution

Add the following location settings to the Flowtime `web.config` file, and replace "*SitePages*" with the library name or the path to where you publish the dashboards.

```
"SitePages">
```
