

Duplicate Form Records in UACT Table

Last Modified on 02/11/2020 6:42 am EST

Description

When a user clicks a form's **Submit** button more than once, multiple records are created in the UACT table.

Cause

There are two possible reasons that multiple records are created.

- A user clicks the **Save** button or **Submit** button multiple times.
- A user clicks the **Save** button and **Submit** button immediately one after the other.

Affected Versions

All

Solution

- Disable the buttons using JavaScript at the time of clicking either of them. In Cora SeQuence 8.x, you should also enable the single-click feature.

Example
