

Manage Supported File Types

Last Modified on 12/03/2017 6:50 am EST

Overview

You can manage which files to support or restrict in Cora SeSequence forms. In the `MimeTypes.config` file, there is a `extensions` section and a `contentTypes` section. You can add and remove file types from these sections, as necessary.

Procedure

1. Access the `MimeTypes.config` file, located in `C:\Program Files\PNMsoft\Shared Resources\Configuration`.
2. Edit the `MimeTypes.config` file as necessary.
3. Perform IISReset.

Supported File Types

Extension	contentType
<code>extension="bmp"</code>	<code>contentType="image/bmp"</code>
<code>extension="csv"</code>	<code>contentType="application/octet-stream"</code>
<code>extension="doc"</code>	<code>contentType="application/msword"</code>
<code>extension="docx"</code>	<code>contentType="application/vnd.ms-word.document.12"</code>
<code>extension="gif"</code>	<code>contentType="image/gif"</code>
<code>extension="jpg"</code>	<code>contentType="image/jpeg"</code>
<code>extension="ods"</code>	<code>contentType="application/oleobject"</code>
<code>extension="odt"</code>	<code>contentType="application/vnd.oasis.opendocument.text"</code>
<code>extension="pdf"</code>	<code>contentType="application/pdf"</code>
<code>extension="ppt"</code>	<code>contentType="application/vnd.ms-powerpoint"</code>
<code>extension="pptx"</code>	<code>contentType="application/vnd.ms-powerpoint.presentation.12"</code>

Extension	contentType
<i>extension="rtf"</i>	<i>contentType="application/rtf"</i>
<i>extension="txt"</i>	<i>contentType="text/plain"</i>
<i>extension="xls"</i>	<i>contentType="application/vnd.ms-excel"</i>
<i>extension="xlsx"</i>	<i>contentType="application/vnd.ms-excel.12"</i>
<i>extension="xps"</i>	<i>contentType="application/vnd.ms-xpsdocument"</i>
<i>extension="zip"</i>	<i>contentType="application/x-zip-compressed"</i>
