Cora SeQuence HotOperations Settings Missing from Flowtime Site Settings

Last Modified on 01/16/2018 7:22 am EST

Description

After you install HotOperations, the **Cora SeQuence** heading and **Configure HotOperations Settings** heading under the Flowtime site settings do not display.

Cause

HotOperations is only supported on SharePoint2013 and later. If you have SharePoint 2013 or later and still do not see the headings, most likely, the HotOperations-SharePoint solution deployment was not successful.

Affected Versions

8.1 and later.

Solution

Follow this procedure to deploy the solution.

1. Verify that the SharePoint Administration service is running.
2. Log in to your SharePoint 2013 Central Administration site.
3. Navigate to **System Settings** > **Farm Management** > **Manage farm solutions**.
4. Locate and click the `pnmsoft.sequence.hotoperations.sharepoint.wsp` file.
5. Click **Deploy Solution**.
6. Under **Deploy When**, select **Now**.
7. Click **OK**.
8. Return to the Flowtime site settings, and configure your HotOperations settings.
