

Server Error in ProcessTOGO Application

Last Modified on 01/16/2018 7:21 am EST

Description

When you open a form or a task in Process^{TOGO} in Cora SeSequence 8 or later, you receive the following error message.

Server Error in '/ProcessToGo' Application.

Parser Error

Description: An error occurred during the parsing of a resource required to service this request. Please review the following specific parse error details and modify your source file appropriately.

Parser Error Message: Could not load file or assembly 'PNMsoft.Sequence.Forms.Web, Version=8.0.0.0, Culture=neutral, PublicKeyToken=0a1a1b90c1c5dca1' or one of its dependencies. The system cannot find the file specified.

Source Error:

[No relevant source lines]

Source File: none Line: 0

Assembly Load Trace: The following information can be helpful to determine why the assembly 'PNMsoft.Sequence.Forms.Web, Version=8.0.0.0, Culture=neutral, PublicKeyToken=0a1a1b90c1c5dca1' could not be loaded.

WRN: Assembly binding logging is turned OFF.
To enable assembly bind failure logging, set the registry value [HKLM\Software\Microsoft\Fusion!EnableLog] (DWORD) to 1.
Note: There is some performance penalty associated with assembly bind failure logging.
To turn this feature off, remove the registry value [HKLM\Software\Microsoft\Fusion!EnableLog].

Version Information: Microsoft .NET Framework Version:2.0.50727.5485; ASPNET Version:2.0.50727.5483

Cause

This is a known issue in the `web.config` file.

Affected Versions

8.1 and later.

Solution

1. Access the Process^{TOGO} `web.config` file.
2. Locate the two control sections that contain the following **tagPrefix** definition.

```
add tagPrefix="sq" namespace="PNMsoft.Sequence.Forms.Web.UI.Controls" assembly="PNMsoft.Sequence.Forms.Web, Version=8.0.0.0, Culture=neutral, PublicKeyToken=0a1a1b90c1c5dca1"
```

3. Replace **8.0.0.0** with **7.0.0.0** in both places.
4. Save the `web.config` file.
