

Processes Do Not Display in Flowtime After Upgrade to Cora SeQuence 8.3

Last Modified on 01/16/2018 7:20 am EST

Description

After you upgrade to Cora SeQuence 8.3, your processes display in the Administration site, but not the Flowtime site.

Cause

The upgrade migrated the Administration site to the new role-based permissions module, but the Flowtime site is configured with the Cora SeQuence 8.2 permissions module.

Affected Versions

8.1 and earlier.

Solution

Verify in the `web.config` file for the Administration site and the Flowtime site that the following attribute is correctly set.
