

Put File Activity Overview

Last Modified on 11/10/2021 1:35 pm EST

Context

The Put File Activity exports one or more files (attachments or array of bytes) from Cora SeQuence to an external storage system.

Add a New Connection to an External Storage System

First, you [define a connection to an external storage system](#).

Supported Storage Systems

- Azure Blob Storage
- Azure File Storage
- FTP
- SFTP
- Network Drive

Define the File Export

Details Tab

Put File Activity Parameters - Details Tab

Parameter	Description
Connection to File Storage	Connection you defined to the external storage system.
Target Path	<p>Path to the folder where you want to export the file to. It is appended to the connection you defined to the external storage system. There are a couple of ways to define the target path. You must use forward slashes (/) when you define the target path.</p> <ul style="list-style-type: none">• Manually: type a target path in the field.• Expression: define the target path from a previously returned value in the workflow. For example, a path returned from a Web Service Listener Activity. <p>Example: <code>https://{externalstoragesystem}/Approved_Claims</code></p>
Source File(s)	<p>The file(s) that you want to export from Cora SeQuence to an external storage system.</p> <p>To define the source file(s), enter an expression that returns one of the following types of data:</p> <ul style="list-style-type: none">• A GUID of an attachment or a list of GUID of attachments• Content of a file in form of byte array• Any dynamic object that contains the following properties:<ul style="list-style-type: none">◦ FileName (string)◦ Content (byte[])
