

## Get Cora SeQuence Credentials from the Credential Store Using the API

Last Modified on 01/16/2018 7:13 am EST

Use this code sample to get credentials from the Cora SeQuence credential store. The code runs from within a custom assembly or custom activity.

```
IWorkflowEngine engine =ActivityExecutionContext.Current.WorkflowInstance.Engine;
IServiceProvider svc = engine.GetService();
PNMsoft.Sequence.Security.CredentialDefinition c;
c= PNMsoft.Sequence.Security.CredentialDefinition.GetCredential (svc, "name");
```
