

How to Find Controls on the Client Side

Last Modified on 08/29/2021 7:52 am EDT

Use these expression parameters in a form's view expressions.

Expression Parameters

Parameter	Description
@ncontainer	Reference to a naming container that has an expression.
@bcontainer	Reference to a binding container that has an expression.
@template	Reference to the template (form view) that contains an expression
@page	Reference to a page.

Code Sample

The following JavaScript code snippet demonstrates how to find a grid control using client side code, that has the ID *Grid1*, which sits inside a form with the ID *Form1*.

```
<%@ Control %>
```
