

Add a Code Snippet Control to the Controls Toolbar

Last Modified on 07/10/2017 8:31 am EDT

To add a code snippet control to the controls toolbar, you need to update several config files. You can add a new category in the toolbar.

- `Toolbox.config`
- `Toolbox.Basic.config`

IMPORTANT: Backup the files before you modify them.

Procedure

1. Access the config files.

`\Administration\Web\UI\UXStudio\Views\AspMarkup\Config`

2. Add the control snippet.
3. Save the files.
4. Perform IISReset.
