

Find IDs of All Users That Submitted a Specific Task

Last Modified on 11/28/2017 8:49 am EST

Use this expression to return a list of IDs for all users that submitted a specific task.

Expression

```
Join({Task1}.Scope().SelectMany(Tasks).where(IsCompleted).Select(UpdatedBy.UserId),";")
```

Returned List

```
(1130;1196;2433;3483)
```
