View a Process Tree

Last Modified on 07/16/2017 7:58 am EDT

The process tree displays the flow of the process and the current pending activity, in Flowtime and in the database. Access to the process tree requires specific permissions.

To view the process tree in the database, run the following script on the database.

```
SELECT ta.fldName,
       typ.fldType,
       emps.Employee_Name,
       ia.*
FROM tblInstanceActivities ia
       INNER JOIN tblTemplateActivities ta ON ta.fldGuid=ia.fldTemplateActivityGuid
       INNER JOIN tblActivityTypes typ ON typ.fldGuid=ta.fldType
       LEFT JOIN tblActionItems ai ON ai.fldIActId=ia.fldId
       LEFT JOIN ViewEmp emps ON emps.fldID=ai.fldToId
WHERE ia.fldInstanceWfId=000
ORDER BY ia.fldId
```
