# HotChange

Last Modified on 08/24/2020 5:19 am EDT

Overview

HotChange® is the core architecture of Cora SeQuence, infusing every dimension of PNMsoft Cora SeQuence. Businesses operate in a fluid environment, presented with shifting requirements. HotChange® enables organizations to quickly modify, integrate, and allocate business processes with no downtime. With HotChange®, end users can view resource consumption and process performance, and implement real-time changes that optimize business processes.

HotChange® Benefits

- Reduce time to implement changes to processes
- Ability to keep processes running, while making change (no downtime)
- Ability to integrate rapidly with existing and new systems
- Ability to provide process interfaces on multiple platforms
- Ability to implement new requirements rapidly
- Maintain IT governance and control
