

Implement an Aggregation Footer in a Grid

Last Modified on 07/23/2017 2:31 am EDT

Procedure

1. Create a grid using fast track, or convert the aggregated column to a template column.
2. From the smart panel, select **Edit Template**.
3. Select the footer template for your column.
4. Add a control.
5. In the markup, replace the

```
Average: <%= { act.Query("QueryName").AsQueryable().Select(Field("FieldName")).Average().ToString() } %>
```

The field must be of type numeric.
