

Cora SeSequence 8.3.3 Release Notes

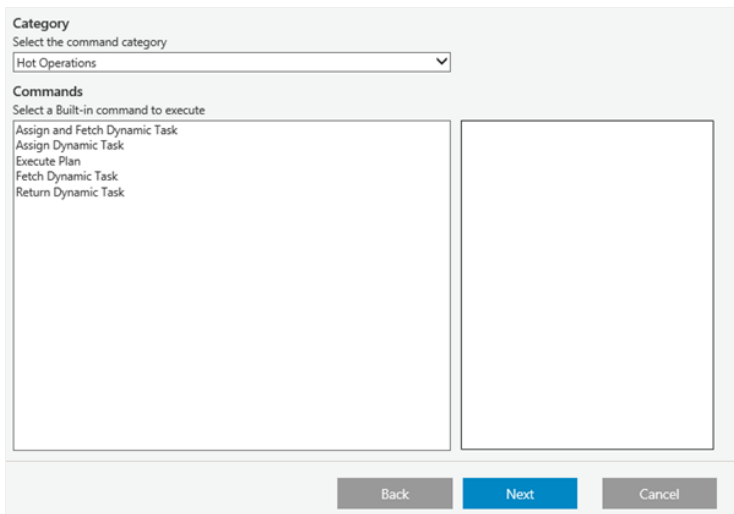

Last Modified on 05/07/2018 10:01 am EDT

28 AUGUST 2017

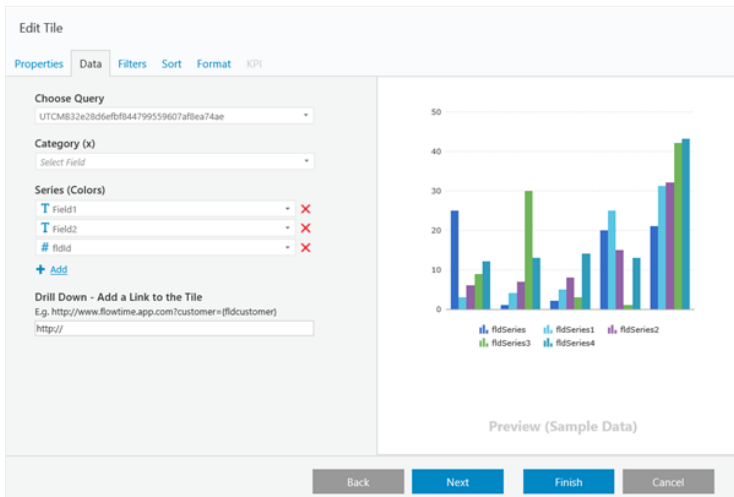

This is an update for Cora SeSequence v8.3.0, which includes new product functionality, and resolves product issues, detailed below.

New Functionality

- **Added functionality to the Built-in Command Activity:** We added several new functions to the Built-in Command Activity, which enable you to define and manage dynamic tasks in HotOperations, from within a workflow.

- **Multi-Series Tiles:** When you define a Multi-Series Tile, you can now add up to 15 series (colors).

Resolved Issues

- **The data source does not persist in Integration Activities.**
- **You cannot use expressions with role-based permissions.**
- **When the delegation type is *Message Only*, the delegated user cannot open the task of the original user.**

- **Email messages display without line breaks.**
- **You can start an instance from the process page, even when the "Can be instantiated" check box is not selected.**

Update Steps

Update from 8.3.2:

1. [Download](#) the files.
2. Make sure the following files and folders are on the same level in the server.

- Administration
- Background Runtime Service
- DB Scripts
- GAC
- exe.bat
- PatchTo8_3_3.ps1

3. From the update folder, right-click the `.exe` file and select **Run as administrator**.
4. Back up the Cora SeQuence database.
5. From the `DB Scripts` folder, run the `PatchSynchronization_Data.sql` file on your Cora SeQuence database.

NOTE: If you are running a Cora SeQuence version earlier than v8.3.0, you must install v8.3.0 before you install v8.3.3.
