After Upgrading to Cora SeQuence 8.3 Organization-Based Permissions Screen is Missing

Last Modified on 01/16/2018 7:17 am EST

Description

When you open a workflow that was created in a version earlier than 8.3, the organization-based permissions screen does not exist, and you cannot edit workflow and activity permissions.

Affected Versions

8.3

Solution

Add the following configuration to the section of the administration `web.config` file, and refresh the page.

```
....
```
