

Define an Advanced Combo Box

Last Modified on 09/05/2017 2:07 am EDT

When you create and define a form, there are several advanced options that enable greater control over the form's appearance and behavior.

Procedure

1. From the top ribbon, click **Options > Advanced**.

2. Click the combo box, and select the following configuration options from the Properties panel.
 - **EnableAutomaticLoadingOnDemand**: enables automatic loading of list results.
 - **ShowMoreResultsBox**: displays the Show More Results box.
 - **ItemsPerRequest**: defines the number of items that display in the drop-down list.
