Cora SeQuence 8.3.4.2 Release Notes

This is an update for Cora SeQuence v8.3.4, which resolves a bug in the `ProcessList.aspx` file, detailed below.

Resolved Issue

The Flowtime `ProcessList.aspx` returns the error **Illegal Character in Path**.

Update Steps

Update from Cora SeQuence v8.3.4.

1. Download the files.
2. Deploy `PNMsoft.Sequence.Flowtime.Controls.dll` to all runtime servers' GAC (Global Assembly Cache).
3. Run `PatchSynchronization_Data.sql` on the Cora SeQuence database.
4. Run IISReset for the change to take effect.

NOTE: If you are running a Cora SeQuence version earlier than v8.3.4, this fix is not relevant.
