Cora SeQuence 7.10.13 Release Notes

This is an update for Cora SeQuence v7.10.x, which resolves product issues detailed below.

Resolved Issue

Slow page response time when setting group permissions for a process, and the organization tree is very big.

Resolution: We added searchable fields to the User and Group permission wizard.

Update Steps

Update from Cora SeQuence v7.10.12.

1. Download the files
2. Run IISReset.
3. Make sure the following files and folders are on the same level in the server.
   - `Administration`
   - `GAC`
   - `exe.bat`
   - `PatchTo7.10.13.ps1`
4. Run the `exe.bat` command as an administrator on every Cora SeQuence server.
5. Backup the Cora SeQuence database.
6. Run the `PatchSynchronization.sql` `PatchSynchronization_Data.sql` scripts from the `DB Scripts` folder on the Cora SeQuence database.

> **NOTE**: If you are running a Cora SeQuence version earlier than v7.10.12, you must install v7.10.12 before you install v7.10.13.
