

Cora SeQUENCE 8.3.4.3 Release Notes

Last Modified on 05/07/2018 10:05 am EDT

This is an update for Cora SeQUENCE v8.3.4, which resolves an issue in the due date calculation, detailed below.

Resolved Issue

When defining a task due date by working time, the due date does not resolve correctly.

Update Steps

Update from Cora SeQUENCE v8.3.4.

1. [Download](#) the files.
2. Deploy `PNMsoft.Sequence.dll` to all runtime servers' GAC (Global Assembly Cache).
3. Run `PatchSynchronization_Data.sql` on the Cora SeQUENCE database.
4. Run IISReset for the change to take effect.

NOTE:

You must deploy Cora SeQUENCE v8.3.4.2 and v8.3.4.1 to the server before you apply this fix. If you are running a Cora SeQUENCE version earlier than v8.3.4, this fix is not relevant.
