Analytics Designer Loads Empty After Upgrade of Cora SeQuence Sites Configured with HTTPS

Last Modified on 09/05/2018 10:54 am EDT

Description

The Analytics designer does not display any content after upgrading to V8.3, V8.4, V8.5, or V8.6.
The issue only happens in Cora SeQuence sites that are configured with HTTPS.

Affected versions

- 8.3
- 8.4
- 8.5
- 8.6

Solution

1. Open the `web.config` file.
2. Remark the following security mode:
