Cora SeQuence 8.6.1.1 Release Notes

Last Modified on 10/08/2018 6:50 am EDT

17 September 2018

This is an update for Cora SeQuence v8.6, which includes a fix for the issue detailed below.

Resolved issue

When you used the Split function to set up group or user expressions for task/message recipients, you got this error message: "Expression of type 'GroupView' expected," and could not continue setting up the workflow.

Resolution: Validation was removed and the issue was fixed to allow the use of split function.

Update steps

Updating from v8.6.1

1. Back up your Cora SeQuence database.
2. Back up the following DLLs:
   a. `PNMsoft.Sequence.Design.dll`
   b. `PNMsoft.Sequence.Studio.dll`
3. Download the ZIP file, and extract it.
4. Open the **DB Scripts** folder, and run the `PatchSynchronization_Data.sql` script on your Cora SeQuence database.
5. Run IISRESET.
6. Make sure the following files and folders are in the same level on the server.
   - Engine
   - `SequencePatch.xml`
   - `SequencePatcher.ps1`
7. Run `SequencePatcher.ps1` file as Administrator on the Cora SeQuence Flowtime and Administration servers as follows:
   a. Right click `SequencePatcher.ps1`, and then select **Run with PowerShell**.
   b. Press any key to run as administrator.
8. Run IISRESET for the change to take effect.

Rollback steps (in case of failure)

1. Restore the Cora SeQuence database to previous state.
2. Restore the backed up DLLs files.

NOTE: If you are running a Cora SeQuence version earlier than v8.6.1.1, you need to install v8.6.1 before you install v8.6.0.1.
