

# Flowtime design variables

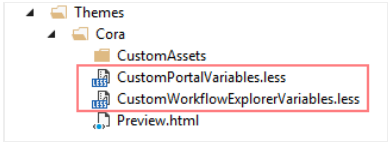

Last Modified on 08/25/2022 1:33 pm EDT

Design variables are valid for Cora SeSequence V8.7–V9.x only.

Starting with V8.7, Flowtime uses a new theme: Cora. You can customize the new theme using two sets of variables:

- CustomPortalVariables.less: Includes variables that change the UI elements in the Flowtime website.
- CustomWorkflowsExplorerVariables.less: Includes variables that change the elements on the left panel and top menu of form pages (marked in red in the screenshot on the left).

## File location

Version	Location	
Starting V8.7	<server name>\Program Files\PNMsoft\Shared Resources\Themes\Cora	
V9.x	C:\inetpub\wwwroot\Cora SeSequence\Flowtime\Shared Resources\Themes\Cora	

## List of common variables

There are more than 900 variables that you can use to change Flowtimes design elements.

For more information on how to apply these variables, see the [Redesign Flowtime using variables](#).

CustomPortalVariables.less	CustomWorkflowExplorerVariables.less
@primary-color	@primary-color
