Add Countries to Cora OpsManager

Last Modified on 05/30/2019 6:00 am EDT

Note:
In Cora OpsManager version2.0, these settings are done on Flowtime under Ops Manager Admin > General Settings.

In Cora OpsManager, to add values to the country selection list, you need to add values to the country lookup.

In the Administration Console, go to **Administration** > **Lookup Tables** > **ICM Data Model** > **Country**, and add record per each country.
