# Cora SeQuence 8.7.0.1 Release Notes

Last Modified on 02/03/2019 4:39 am EST

8 JANUARY 2019

This is an update for Cora SeQuence V8.7, which includes a fix for the issues detailed below.

Resolved issues

- Azure Service Bus Activity: The Azure Service Bus job did not work when the **Require Acknowledgement** option was not selected.
- App Studio: The **Find** tool did not work after you deleted a word using the delete icon. You had to reload the page.

- Flowtime: Grid pagination icons were not displayed in Internet Explorer 11.

Update steps

Updating from V8.7.

1. Back up your Cora SeQuence database.
2. Back up the following files:
    - Administration site:
        - Web\UI\Resources\JavaScript\Shell\dteToolbox.js
        - bin\PNMsoft.Sequence.Studio.dll
    - GAC:
        - PNMsoft.Sequence.Jobs.AzureServiceBus.dll
3. [Download](#) the ZIP file.
4. Open the **DB Scripts** folder, and run the `PatchSynchronization_Data.sql` script on your Cora SeQuence database.
5. Make sure the following files and folders are in the same level on the server.
    - Engine
    - SequencePatch.xml
    - SequencePatcher.ps1
6. Run `SequencePatcher.ps1` file as Administrator on the Cora SeQuence Flowtime and Administration servers.
    a. Right click `SequencePatcher.ps1`, and then select **Run with PowerShell**.

Rollback Steps (in case of failure)

1. Restore the Cora SeQuence database to previous state.
2. Restore the backed up files.

> **NOTE**: If you are running a Cora SeQuence version earlier than V8.7, you need to install V8.7 before you install V8.7.0.1.

> **Heads up!**
> Cora SeQuence V8.8 will support Microsoft SQL Server 2014 SP1 and later only. Details to come in the

next releases.
