

# Product Version Lifecycle

Last Modified on 07/04/2024 3:19 am EDT

Starting with V10.0, Cora SeSequence has been renamed to Cora Orchestration.

## Overview

Cora SeSequence lifecycle starts when the product version is released and ends when that version is no longer supported. Among other things, each stage in the lifecycle determines the level of support, maintenance services, and access to certain product resources.

It is important to be aware of the status of your product version, to understand which services are available for your product, and to help you make informed decisions on when to update or upgrade.

Cora SeSequence lifecycle includes three main status: Mainstream Support, Extended Support, and End of Life.

## Status description

Status	Description
<b>Mainstream Support</b>	<ul style="list-style-type: none"><li>• Duration: From the version release date to the Mainstream Support end date.</li><li>• Maintenance and support services: Standard support services according to the customer's maintenance agreement.</li><li>• Patches/fixes: Released only for the latest product version.</li></ul>
<b>Extended Support</b>	<ul style="list-style-type: none"><li>• Duration: From Mainstream Support end date to Extended Support end date.</li><li>• Maintenance and support services: Reasonable efforts only.</li><li>• Patches/fixes: No patches or fixes are released for products with this status.</li></ul>
<b>End of life</b>	<ul style="list-style-type: none"><li>• Duration: From Extended Support end date.</li><li>• Maintenance and support services: No product support or maintenance are provided.</li><li>• Product usage and upgrade access: License is for usage and upgrade access only. Upgrade access includes access to upgrade path, downloadable files, and documentation.</li></ul>
