

Cora SeSequence 8.7.0.4 Release Notes

Last Modified on 02/28/2019 10:51 am EST

28 FEBRUARY 2019

This is an update for Cora SeSequence V8.7, which include the fix detailed below.

Resolved issue

The Email Listener did not process emails that included embedded attachments whose URLs exceeded 255 characters. This issue occurred because the `AttachmentContentLocation` property was limited to 255 characters.

The maximum length of the `AttachmentContentLocation` property increased to 4000 characters.

Update steps

Updating from V8.7.0.3

1. Back up your Cora SeSequence database.
2. Back up the following files:
 - Administration site's bin folder:
 - `PNMsoft.Sequence.Studio.dll`
 - All servers, in the GAC folder:
 - `PNMsoft.Sequence.Jobs.Listeners.Email.Activities.dll`
3. [Download](#) the ZIP file.
4. Open the **DB Scripts** folder, and run the following scripts on your Cora SeSequence database.
 - `PatchSynchronization.sql`
 - `PatchSynchronization_Data.sql`
5. Make sure the following files and folders are in the same level on the server.
 - `Engine`
 - `SequencePatch.xml`
 - `SequencePatcher.ps1`
6. Run `SequencePatcher.ps1` file as Administrator on **all** Cora SeSequence servers.
 - a. Right click `SequencePatcher.ps1` , and then select **Run with PowerShell**.

Rollback Steps

1. Restore the Cora SeSequence database to previous state.
2. Restore the backed up DLL files.

NOTE: If you are running a Cora SeSequence version earlier than V8.7.0.3, you need to install V8.7.0.3 before you install V8.7.0.4.

Heads up!

Cora SeSequence V8.8 will support Microsoft SQL Server 2014 SP1 and later only. Details to come in the next releases.
