

# Modify Grid Columns in Cora OpsManager

Last Modified on 02/20/2020 9:14 am EST

## Previous to V3.0

In Cora OpsManager, the config files of “Team Member”, “Team Leader”, and “Operations Manager” have default columns that are displayed in the grid. You can modify the config file to add or remove columns in the grid.

- OpsManagerTasksServiceMetadata.OpsCenter.config
- TeamLeaderTasksServiceMetadata.OpsCenter.config
- TeamMemberTasksServiceMetadata.OpsCenter.config

The config file is placed at:

```
C:\Program Files\PNMsoft\Shared Resources\Components\HotOperations\Flowtime\Config\OpsCenter\ServiceMetadata
```

### IMPORTANT

Keep in mind; you need to do this change every time you upgrade Cora OpsManager.

## V3.0 and later

In Cora OpsManager, the config files of Team Member, Team Leader, and Operations Manager have default columns that are displayed in the grid. You can modify the config file to add or remove columns in the grid.

- OpsManagerTasksServiceMetadata.OpsCenter.config
- TeamLeaderTasksServiceMetadata.OpsCenter.config
- TeamMemberTasksServiceMetadata.OpsCenter.config

The config file is placed at:

```
C:\inetpub\wwwroot\Cora Sequence\Flowtime\Shared Resources\Components\HotOperations\Flowtime\Config\CoraOps\ServiceMetadata
```

### IMPORTANT

You need to make these config file modificationsevery time you upgrade the Cora OpsManager.
