

## Customize Portal Menu

Last Modified on 02/05/2020 11:11 am EST

### Previous to V3.0

The default portal menu of Cora OpsManager arrives with both Cora SeQUENCE and Cora OpsManager. If your organization use only Cora OpsManager, you may remove the Cora SeQUENCE items from the menu.

To remove Cora SeQUENCE,

1. Go to C:\Program Files\PNMsoft\Shared Resources\Components\Flowtime\Config\Portal\Commands, on your system.
2. Edit the **OpsCenter.xml** to comment the following tags:
3. Make Cora OpsManager as default page:
  - a. Go to C:\inetpub\wwwroot\Flowtime.
  - b. Edit **Web.config** file.
  - c. Search for .
  - d. Remove or comment all related lines, and leave this line: uncommented.
  - e. Go to IIS > SeqWeb.
  - f. Click **Content view** tab.
  - g. Right click **Default.aspx**.
  - h. Select **Switch to feature View**.
  - i. Click **default.aspx** that appears under Seqweb.
  - j. Double click **Http Redirect**.
  - k. Select **Redirect requests to this destination** check box, and add /OpsCenter/Default.aspx in the field.
  - l. In Set Status Code, select "Permanent Redirect (308)".
  - m. Click **Apply**, on the right side menu.
  - n. Reset IIS.

### V3.0 and later

The default portal menu of Cora OpsManager arrives with both Cora SeQUENCE and Cora OpsManager. If your organization use only Cora OpsManager, you may remove the Cora SeQUENCE items from the menu.

To remove Cora SeQUENCE,

1. Go to **Administration > Global Settings > Application Variables**.
  - a. Locate and edit **CoraOpsManager.CoraSeSequenceMenuItemVisibility** to **False**.
2. Make Cora OpsManager as default page:
  - a. Go to IIS > SeqWeb.
  - b. Click **Content view** tab.
  - c. Right click **Default.aspx**.
  - d. Select **Switch to feature View**.
  - e. Click **default.aspx** that appears under Seqweb.
  - f. Double click **Http Redirect**.
  - g. Select Redirect requests to this destination checkbox, and add **/CoraOps/Pages/Default.aspx** in the field.
  - h. Select **Redirect requests to this destination** check box, and add **/OpsCenter/Default.aspx**

in the field.

- i. In Set Status Code, select "Permanent Redirect (308)".
- j. Click **Apply**, on the right side menu.
- k. Reset IIS.
