

Cora SeSequence Custom Applications Upgrade

Last Modified on 05/07/2021 6:15 am EDT

Overview

You build customized applications using the project templates provided with the latest VSIX extensions. However, when you upgrade customized applications, you need to manually edit your existing projects.

Cora SeSequence project templates

Site applications	Service applications
<ul style="list-style-type: none">AdministrationFlowtimeWebAPI	<ul style="list-style-type: none">Job Execution Service (JES)Background Runtime Service (BRS)Active Directory Synchronization Service (ADSS)

Upgrade actions

In your project, upgrade your [NuGet package](#) to the latest build of your Cora SeSequence version from the Cora SeSequence repository. Then add or remove specific NuGets and change project properties and other configurations per application.

NOTE

Contact [Support](#) to obtain credentials to access the Cora SeSequence repository.

Click a tab to see the required actions for each application upgrade.

Administration

Upgrade from	Upgrade to	Action
9.2.0.94	9.2.2.20	None
9.2.2.20	9.3.0.195	Remove NuGet: <ul style="list-style-type: none">Genpact.CoraSeSequence.ElasticSearch
