

Cora OpsManager 3.2.2 Release Notes

Last Modified on 06/07/2021 9:17 am EDT

December 2020

This is an update for Cora OpsManager V3.2, which resolves the product issues detailed below.

To download the release package and instructions, click [here](#).

Resolved Issues

#	Issue	Resolution	Ticket #
1	Querying the Reasons table without filtering resulted in diminished performance.	The performance issue is resolved now.	
2	The Current Open Cases By Status report had issues.	The report issues are resolved.	
3	Email listener activities with Graph API protocol moved email to the processed folder without creating a new workflow instance.	The issue is resolved now.	
4	The reminder email was not sent if you added many recipients in the reminder email To list and the list had more than 510 characters.	The reminder email is now sent to all the recipients in the To list.	213336
5	The request details were not displayed if you opened a request created before V3.2.	The request details are now displayed.	237340
