Add a New Email Connection

Last Modified on 09/07/2022 8:13 am EDT

Starting with V10.0, Cora SeQuence has been renamed to Cora Orchestration.

V9.8.3-10.0

Overview

To send emails from Cora SeQuence to an email server, you need to set up a connection that uses the relevant email protocol: SMTP or Microsoft Graph.

Required parameters

Parameter	Description	For SMTP	For Microsoft Graph
Name	A unique connection name	Yes	Yes
Server	SMTP server name	Yes	No
Port	Server port	Yes	No
SSL	Establishes an SSL connection	Yes	No
Credential Name	Select a unique credential.	Select a Username Password type credential.	Select an OAuth2 Client Credentials type credential.

NOTE

It is recommended to create the required credentials before setting up the email connection. For details on creating a credential, see this article.

Add connection

- 1. In the Administration site, go to **Administration** > **Global Settings** > **Email Sending Connections**.
- 2. Click Add New Record.

Sequence					Sam 🗸
▲ Administration	nail Sending Connections				→⊠
Analytics Ec	lit Type		Name	Default	Delete
Archiving	Т		Т	□ T	
 Global Settings 	SMTP		(Default SMTP Connection)		
Application Variables	Microsoft Graph		MSGraph1		×
Connection Strings					2 items in 1 pages
Credentials	Add New Record				
Custom Message Types					
Email Sending Connections					
Email Templates					
External Service Consumers					
File Connections		G			
Global Variables					
HTTP Consumers					
HTTP Listeners					
In-Process Service Consume					
Jobs Management					
Kafka Connections					
Vella Paralusara					

3. Select a connection type.

Connection Type	*	
SMTP Microsoft Graph	2	

- 4. Based on the selected connection type, enter the required parameters.
- 5. To select a credential, click the ellipsis button.
- 6. On the Run As... screen, do one of the following:
 - Select one of the existing credentials, and then click **OK**.
 - If the list doesn't include the credential you need, to create a new one, click **Add**. For more details, see this article.
- 7. Click **Add**.

The new email sending connection is added to the list of connections and can be used when configuring email activities.

Previous to V9.8.3

Follow the steps to add a new SMTP connection for sending emails.

Select SMTP Connection	
Select from the list, or Add New Default (default SMTP connection)	^
	New Edit X Delete Refresh
	Next Cancel
SMTP Connection Details	
Name * Server *	
Port * 25 Default Port Credential Name	
Selected by Default
