

Map PowerShell Modules Versions to Cora SeSequence Versions

Last Modified on 06/22/2022 11:13 am EDT

Starting with V10.0, Cora SeSequence has been renamed to Cora Orchestration.

Follow this table to map PowerShell modules versions to Cora SeSequence versions.

Cora SeSequence version	PowerShell modules version
9.0.x	1.0.92
9.1.x	1.0.104
9.2.x	1.0.141
9.3.x	1.0.154
9.4.x	1.0.172
9.4.3	1.0.188
9.5	1.0.214
9.6	1.0.237
9.6.1	1.0.242
9.7	1.0.243
9.8.3	1.0.243
10.0 Cora Orchestration	1.0.255
10.0 Orchestration Services (Linux)	1.0.7
10.1 Cora Orchestration	1.0.255

IMPORTANT

The signing certificate for PowerShell modules V1.0.214 or later has changed.

For a successful upgrade, either delete the existing modules and install the new versions, or set the `-SkipPublisherCheck` parameter.

For more information on the `-SkipPublisherCheck` parameter, see [this link](#).
