

Hide actions toolbar in RTE

Last Modified on 12/30/2024 1:12 pm EST

As a workflow developer, if in a form you need to hide the actions toolbar of an RTE control, then set the property `EnableModule=true`.

For example:

```
<sq8:Editor runat="server" EnableModules="True" ID="Editor1">
  <Tools>
    <sqr8:EditorToolGroup></sqr8:EditorToolGroup>
  </Tools>
</sq8:Editor>
```
