Culture Resolution Configuration

Last Modified on 01/29/2025 6:03 am EST

Overview

The culture-resolution.yaml configuration file defines the language and style for the data in the system.

Template

```
kind: ruleSet
metadata:
  name: extraction/v1/documents/culture-resolution
spec:
 nodes:
 - if: 'it["Country"] == "US"'
   then:
     culture: en-US

 - if: 'it["Country"] == "USA"'
   then:
     culture: en-US

 - if: 'it["Country"] == "Germany"'
   then:
     culture: de-DE

 - if: true
   then:
     culture: null
```

Parameter	Description
If then	The condition based on which culture is decided.
Culture	The language and style for the data in the system.

For example, in the above template:

```
 - if: 'it["Country"] == "US"'
   then:
     culture: en-US
```

If the country is US, then the culture chosen is en-US.
