- New features and enhancements
- Known issues

What's New in Cora Case Manager V4.2?

Cora Case Manager V4.2 release supports Cora Orchestration V10.9.x. It includes updates to the deployment model, alignment with Cora Orchestration, and UI branding changes.

New features and enhancements

- Deployment on Cluster Infrastructure: Cora Case Manager is now deployed on cluster-based infrastructure instead of virtual machines (VMs) that were used up to V4.1.
- Alignment with Cora Orchestration V10.9.x: We have enhanced the system to ensure compatibility with and support all features available in the Cora Orchestration V10.9.x release stream.
- Enhanced User Interface (UI): Enhanced the portal to align to the Genpact's latest branding, including new color and theme palette.

IMPORTANT

- Make sure to check the upgrade paths article before upgrading to Cora Orchestration V10.9.x.
- For any breaking changes in Cora Orchestration, see this article.
